

CARÈ

**The strength of
die-cast aluminium
and the ease
of the corner
grub screw.**

Die-cast aluminium corner joint tightened with a grub screw at the top and fixed outward buttons.

This corner joint with vertical expansion replaces the extruded one and improves the assembly of the profile. It has specific glue channels to guarantee perfect sealing and greater strength while avoiding any waste or spill.

Patented.

- + Precise and rigid junction**
- + Glue channels and special injection adapter**
- + No additional profile processing required**
