

FUJI CROSS

**A single product
for transom and mullion alignment.**

FUJI CROSS

Enhanced design
for glue injection port

Grooved for
gasket clearance

Large Torx key cams
for secure fixing

Die-cast aluminum alignment corner joint for standard angles, transoms and mullions, the Fuji Cross has no limits. It is the only product that can close and align profile lawlessly thanks to its adjustable cams. Patented [MONTIX](#) anti-corrosion coating. Patented.

- ⊕ No profile processing
- ⊕ Fixing achieved after the profile is assembled
- ⊕ Adaptable to full range of profiles
- ⊕ Montix anti-corrosion coating
