

FUJI EDGE

An innovative solution

FUJI EDGE

Internal alignment corner joint for quick assembly on Euro groove, in die-cast aluminium with adjustable cams and tightening screws. Designed for T and cross junctions, it can be installed on assembled profiles without any processing. It has specific glue channels to guarantee perfect sealing and greater strength while avoiding any waste or spill.

Patented.

- + For Euro groove
- + Tightening screws
- + Installation on assembled profiles
- + Great mechanical resistance
